Manufacturer

Description

This package includes the KESsv2 SLAVE hardware and [MARINE Protocol](#) activation.

[KESsv2](#) allows you to read and write to the ECU by connecting the tool to the diagnostic port using the supplied connector. The SLAVE version of the tool allows you to read/write files that are supplied to you from the MASTER version tool. KESsv2 SLAVE will rewrite (FLASH) the modified file back to the OEM ECU while performing the checksum correction automatically.

Includes 12 Month Subscription from date of purchase.

Included with the hardware are the following:

- 144300K201 - KESsv2 Universal cable
- 144300KCAN - KESsv2 OBDII cable
- USB 2.0 cable

Part Numbers: 14P600KS01, 14P600KS10
